Summary

Computer Science Engineering student with hands-on experience in full-stack web development, real-time tracking systems, and hardware-integrated applications. Built and deployed live projects using React, Firebase, GitHub Actions, and ESP32-based GPS systems. Passionate about developing practical, low-cost technology solutions for real-world problems.

Technical Skills

Languages: C++, HTML, CSS, JavaScript

Frontend: React.js, Vite, Responsive UI Design

Backend: SQL, Firebase

Deployment: Tiiny url hosting services , GitHub Pages

Tools: Mysql, GitHub, VS Code, Tiiny.host, Arduino IDE

API Integration: OpenStreet Maps API , EmailJS

Hardware Integration: GPS, ESP32, ARDUINO UNO

Projects

LaalPari - Bus Tracking System · [code](#)

[Live](#) · 2025-26

- “LaalPari” a real-time college bus tracking system using HTML, CSS, JavaScript, Firebase, OpenStreetMap API
- Integrated ESP32 with GPS module using Arduino IDE for live bus location tracking and real-time route updates
- Implemented responsive live tracking interface with estimated arrival timings for Anand Nagar , Ram Nagar routes
- Selected among the Top 5 projects in the CSE department and represented the department at the final year project expo with a low-cost solution built under Rs - 800

Zenith – SGGS Annual Sports Website

[Live](#) · 2024

- Developed official website for SGGS annual sports event Zenith
- Built with HTML, CSS, JavaScript featuring dynamic layouts and real-time announcements
- Implemented live event schedules, team registrations, results display, and media gallery
- Enhanced user engagement through interactive features and responsive design

LiveFlow - Blood Bank Management System · [code](#)

[Live](#) · 2026

- Developed and deployed a modern React-based blood bank management system using Vite and GitHub Pages
- Integrated EmailJS-powered OTP authentication system for secure donor and admin access
- Designed responsive dashboard UI with real-time blood inventory visualization and analytics
- Implemented cloud-hosted live deployment workflow using GitHub Actions for automated updates

Education

Shri Guru Gobind Singhji Institute of Engineering and Technology, Nanded

2022 – 2026

B.Tech in Computer Science and Engineering · **CGPA: 6.51/10**

Yeshwant college , Nanded

2022

12th · percentage: **69.67**

Mahatma Phule High School, Nanded

2020

10th · percentage: **89.60**

Certificates

- **Robotics Projects:** Line Follower Robot, Soccer Playing Robocar & Robo Sumo using Arduino Uno with C programming
- **Rmageddon:** Participated in national-level robotics competition demonstrating technical skills
- **Drone Workshop:** Completed comprehensive training on aerial flight principles and quadcopter operations Gained expertise in quadcopter and hexacopter control systems and flight operations

Leadership & Achievements

- Selected among the Top 5 projects in the CSE department for the final year project expo
- Represented the department by presenting a low-cost real-time bus tracking system built under Rs - 800
- Organized and coordinated Zenith Marathon event activities and crowd management
- Participated in Senior State Volleyball Championship under Maharashtra State Association
- Represented college in volleyball and table tennis competitions
